

# List of examples and problems

This file contains the list of all examples and problems of this interactive teaching text „Mechanics of Materials“. If you downloaded this learning matter into the **dir**, all examples and/or problems are saved in the individual files with the name of **pr#** (# correspond to the number of problem in the frame). You can reach it by a mouse **click** on this frame or by opening the **pdf**-file in the **dir**.

**Examples** illustrate the course content and **problems** may assist to the understanding. They are assigned to the individual chapters, but you will probably need knowledges of other parts.

All examples are followed by the solution. The appropriate link is as the first link below the text, you can use the mouse click or you can open the **pdf**-file in the same **dir**, the name of which is derived from the name of the example by addition of **r**.

## Examples, problems. Simple elasticity theory of bars
